### Additional Optimik module - Cutting Assistant

**The module created especially for dividing saws and panel saws that do not support the process of labeling. With the cutting of Cutting Assistant we can take on the tablet directly on the machine mean a cut parts and print the relevant label on the cut part. This improves and at the same time optimizes the entire production process, eliminating the additional human errors. Also it can be connected by cloud sync, then office can follow the cutting progress in Production Management option in Optimik 4**
